

Mohamad Al Maleh - Senior Frontend Developer

mohammad.maleh@gmail.com ❖ +49 1744764753 ❖ München, Deutschland

Notice Period: as soon as possible

WORK EXPERIENCE (11 years in total)

SocialPals

Dec. 2023 – Jun 2024

Senior Frontend Developer (remote)

München, Deutschland

- Played a role in rebuilding a social media ads management system.
- The stack I used is Angular 17, Typescript, RxJS, Scss, HTML, and project management tools like Asana and Gitlab.
- Established component testing in the project.
- Ensured code quality through regular reviews, refactors, and effective use of tools like Sentry, and OneSky.
- Discussed and Implemented new designs pixel-by-pixel using tools like Sketch and Miro.
- Gave insights and pieces of advice to ensure a smooth transition through the rebuilding of the application.

CELUS

Aug. 2021 – Sep 2023

Frontend Developer

München, Deutschland

- Played a pivotal role in building an AI-powered design platform for electronic engineers, optimizing workflows, and delivering a comprehensive component database.
- Proficiently utilized React.js, TypeScript, Redux, Next.js, Ant Design, Jest, Cypress, and styled-components to craft an engaging web application.
- Collaborated closely with the product team, to implement a pixel-perfect design to deliver a seamless user experience within an agile environment.
- Demonstrated a commitment to code quality achieving 90% test coverage, consistently delivering clean, tested, and strongly typed code.
- Initiated improvements in the frontend engineering hiring process, and played a key role in recruitment.
- Contributed to code reviews, ensuring the highest coding standards were maintained.
- Influenced project architecture, identifying and addressing weaknesses while streamlining development, resulting in a 60% reduction in code volume.
- Additionally, built a robust component library system used by all projects and developers across the company, enhancing consistency and efficiency in development processes.

GK Tech

Fab 2018 – Jul 2021

Senior Frontend Developer

Istanbul, Turkey

- Initiated and maintained over 10 diverse projects, including a cryptocurrency exchange and loan projects and a high-impact mobile application with a user base exceeding one million.
- the stack I used is React.js, React Native, Redux, Ant Design, and SCSS to deliver exceptional results.
- played a dual role in designing interfaces and optimizing user experiences, while maintaining direct and effective communication with stakeholders to transform their ideas into reality.

ProPlan

Full Stack Developer

Sep 2017 – Jan 2018

Istanbul, Turkey

- Led the development of a third-party construction web application as the first developer.
- The tech stack I used is JavaScript, React.js, Redux, SCSS, Express.js, Node.js, MySQL, and AWS web services.
- Actively engaged in direct communication with stakeholders to understand their requirements and ideas.
- Took charge of both backend and frontend initiation, establishing the entire development workflow, from configuring Jira for project management to creating repositories and pipelines on Bitbucket, ensuring an efficient and streamlined development process.

GK FX

Mid Senior Frontend Developer

Jul 2015 – Aug 2017

Istanbul, Turkey

- Worked with an English-based company specializing in alternative finance, where I played a pivotal role in the development and maintenance of a Forex Contract Lifecycle Management Application (CLM).
- Proficiently utilized a tech stack comprising JavaScript, AngularJS, Sass, Webpack, Jasmine, and Mocha for testing in an agile environment.
- Introduced and implemented unit and end-to-end testing to enhance application quality.
- Successfully refactored the entire application to enhance modularity and testability, optimizing its overall performance and maintainability.

FIMM

Junior full-stack developer

Dec 2012 – Jul 2015

Istanbul, Turkey

- Developed and maintained a social media application, handling both frontend and backend aspects.
- Utilized a diverse tech stack, including jQuery, AngularJS, CSS, PHP, Laravel, MySQL, and RabbitMQ.
- We transitioned from web MVC to API-driven architecture to improve application performance.
- I took over the frontend part of it and rebuilt the application using AngularJS.

EDUCATION

Arab Academy for Science Technology

Bachelor's Degree of Computer Engineering

May 2010

Latakia, Syria

- Graduation project: built a graphic simulator for a wireless controlled robotic arm, using MatLab

SKILLS

- ReactJS (5 Jahre)
- NextJS (1 Jahre)
- Redux (5 Jahre)
- TypeScript (2 Jahre)
- JavaScript (10 Jahre)
- ReactQuery
- Scrum & Agile (5 Jahre)
- REST APIs(9 Jahre)
- Unit-Testing (Cypress, react testing library, Jest) (5 Jahre)
- Git (7 Jahre)
- CSS, SCSS (10 years)
- HTML (10 years)
- React Native (1 year)

VALUES

- Curious
- Taking ownership
- Being flexible
- Being respectful
- Preserve integrity
- Communicate openly
- Embrace diversity
- Decide consciously
- Contribute actively
